EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Applicants Attorney (Mr. Richard W. James, Reg No. 43,690), on July 27, 2005, without traverse.
3. The application has amended as follows:

In the claims

Cancel claims 1-17.

Cancel claims 27-29.

Amend claim 18 as follows (see attached):

[0052] 18. (currently amended) A method for processing a low resolution image from a slide to determine a specimen locations on the slide, the method comprising:

cropping the low resolution image to remove portions of the low resolution image that correspond to non-slide objects, said cropping including determining a location of at least one boundary by searching at least one interval corresponding to at least one boundary region;

inputting the cropped image into a tissue finding component, wherein the tissue finding component identifies a region containing the specimen by applying a filter that incorporates knowledge of typical appearance and location of specimen and non-specimen slide regions and outputs a matrix whose values indicate which regions of the slide should be imaged, the matrix not including portions of the image falling outside of the boundary; and

transposing positions of the matrix into actual stage coordinates, and capturing a microscopic image at those stage coordinates.

REASONS FOR ALLOWANCE

4. Based on applicant's amendment, filed 7/27/2005, see page 2, of the remarks, with respect to claims 18-25 have been fully considered and are persuasive and upon further consideration the art rejection of 103(a) for claims 18-25, are hereby withdrawn.

5. The following is an examiner's statement of reasons for allowance.

The instant invention generally relates to microscopic digital imaging of complete tissue section of medical and research use.

The (Bacus) reference does not teach location of specimen and non-specimen slide regions and outputs a matrix whose values indicate which regions of the slide should be imaged, the matrix not including portion of image falling outside of the boundary.

These key features in combination with the other features of the claimed invention are neither taught nor suggested by the art of record.

Claims 18-26 and 30-32 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
